

ABSTRACT OF THE DISCLOSURE

SYSTEM AND METHOD FOR CUSTOMIZING AN
INTERACTIVE TRAINING SEQUENCE

5 The present invention provides an improved system and method for
customizing an interactive training sequence. The present invention includes one
or more sets of predefined questions for gathering predefined information of the
user, a customization module for customizing the training sequence responsive to
the user response to the set of predefined questions, one or more login
10 identifications for uniquely linking the custom training sequence to the user, a
training module for playing the custom training sequence in a user understandable
format when selected by the user. The custom training sequence is stored as a
plurality of digital files, and each digital file is designated by a Uniform Resource
Locator.

15 The customization system and method of the invention further
provide an interactive product service manual that includes a documentation
module for displaying documents of said manual in a user understandable format
responsive to user selection, a simulator module for playing at least one interactive
animated simulation in a user understandable format responsive to user selection, a
20 customization module for customizing an interactive training sequence responsive
to a user response to a set of predefined questions, and a training module for
playing said customized interactive training sequence in a user understandable
format responsive to user selection.
